Head of Private Markets joins Future Fund

The Future Fund today announced the appointment of Gary Gabriel as Head of Private Markets within its Investment Policy team.

Gary joins the Future Fund from UniSuper where he was also Head of Private Markets.

Gary will be responsible for leading a team of portfolio managers investing across the full range of global private market opportunities including real estate, private equity, infrastructure and timber.

David Neal, Chief Investment Officer of the Future Fund, said the appointment helped to further build the Fund's investment capability.

"Gary's expertise in private markets will be a significant benefit to the Fund as we develop our portfolio. As well as building our private market exposure he will have an important role to play in contributing to the total fund portfolio construction process and achieving collaboration across our entire investment team," said Mr Neal.

Gary will start work with the Future Fund in late November.
